QED Hi-K containers are thermoformed from high impact ABS and constructed to give both inner and outer walls filled with a high density rigid polyurethane foam. This construction gives both excellent physical and thermal protection to the contents.

Available in a range of standard sizes, bespoke designs can also be offered. Bespoke internal foam fitments are also available, along with labelling and screen printing.

A range of options include - pressure relief valves (PRV), humidity indicators, internal dividers and moulded trays.

Internal Sizes (mm)			
Length	Width	Total Height	
		Base	Lid Height Options
245	235	120	50 or 95
320	220	100	50 or 75
330	210	70	35 or 50
360	135	70	50
