Aluminium F & W containers

QED fabricated and welded (F&W) aluminium containers are constructed to comply with the relevant parts of Def-Stan 81-41 level J, these containers can be supplied to exact size requirements and configured with many types of handles and fasteners.

Additional internal and external aluminium sections can be included for increased strength and protection as required.

Lids are fitted with a sealing gasket and can be either hinged or removable.

Many paint finishes can be applied including NATO green infra red reflective to Def-Stan 80-208.

Bespoke internal foam fitments can be designed and fitted and containers can be labelled or printed with required information.

A range of options can be provided, including pressure relief valves, wheel mobility etc.
